

Manager Professional Development

Play a key leadership role in one of Australia's most progressive membership organisations. Represented in all states, Australian Physiotherapy Association have 13,000 members, provides training and support, and advocates for greater access to quality physiotherapy.

Reporting to the CEO, you will manage a small team and draw upon the clinical expertise of members for program delivery. Your responsibility is to create a strategic and systematic approach to APA's national PD programs to meet the needs of members. Programs are structured at different levels, and will build upon e-learning platforms where appropriate.

This is an entrepreneurial role within APA so that, in addition to your expertise in PD, you will need a sound business approach to develop opportunities that add value for both members and the association.

Please email your application. Contact Philip Mayers or Peter Dakin for further information.
